

Race to make a CLEFT baby smile!

Their starting point is here ...

... and their finishing line's here.

When you donate to
the charity CLEFT,
you're part of that
amazing journey.

Around 250,000 babies are born with clefts of the lip and/or palate around the world each year. In the UK, clefts occur in one in 700 newborns.

CLEFT aims to improve their care by funding research into treatment and surgical techniques.

Help us to help
these children
face the world.
